

OFFICIAL DOCUMENT SORT OF

ZOKI WHITEPAPER

Bitcoin First Meme Coin

**Born in the Dark Ages Found on BTC Revived on Robinhood Unleashed
on ETH**

Rewards distributed in cbBTC

Version 1 September 2026

Why Zoki Exists

Zoki is for people who like Bitcoin, memes, black cats, and projects that do not speak fluent corporate nonsense.

- **Bitcoin first.** Zoki respects the original. Everything else must earn attention.
- **Meme first.** A meme should be memorable before it becomes complicated.
- **No fake promises.** No guaranteed moon. No guaranteed riches. No rented spaceship in the roadmap.
- **Black cat energy.** For centuries, black cats were blamed for bad luck. Zoki reviewed the evidence and found the humans guilty.
- **A little rivalry.** White cats had their era. Very cute. Zoki survived the Dark Ages and developed better taste in Bitcoin.

This document discriminates only against boring cats.

What Zoki Will Tell You

The mission is public. The machinery behind it is not. Zoki announces things when they are ready, not when somebody types wen for the forty seventh time.

- **The public mission.** Build a recognizable Bitcoin loving meme culture with a community that can laugh, create, and stay curious.
- **The private file.** Everything else is top secret. Plans will be revealed as they become real.
- **The announcement policy.** No theatrical countdowns for unfinished ideas. Zoki prefers surprises that actually work.
- **The promise policy.** Expect no promises. Watch the actions. Decide for yourself.
- **The attitude.** Zoki has seen plagues, kings, wars, bubbles, influencers, and questionable token launches. You are not going to fool this cat.

If Zoki told you everything now, it would not be top secret.

Roadmap Without the Theater

Most roadmaps are a collection of arrows pointing toward a moon. Zoki has replaced the arrows with standards.

- **Waiting for exchanges.** Relax. Zoki will not stand outside an exchange shaking a food bowl. They can arrive when they understand who walked in.
- **Waiting for utilities.** Psh. Wrong question. Classified work stays classified. Worry less about feature lists and more about whether your bag looks embarrassingly small. That is a joke, not financial advice.
- **Waiting for marketing.** Every sharp meme, every original post, and every community member who understands the character is marketing.
- **Waiting for the moon.** Ask the moon. Zoki handles the mission, not the sky.
- **Waiting for dates.** Announcements come when the work deserves an announcement. A calendar does not make a project serious.

No begging No bluffing No ordinary roadmap

How to Behave Around Zoki

You do not need permission to join the culture. You do need a sense of humor and the ability to think for yourself.

- **Create.** Make memes, stories, art, jokes, and chaos that still looks unmistakably Zoki.
- **Stay sharp.** Do your own research. Verify links. Ignore impersonators. Never send assets because a stranger has a convincing profile photo.
- **Respect the character.** Zoki is a natural black cat with amber eyes, a pink tongue, and a polished gold Bitcoin B earring on the left ear.
- **Respect the community.** Cocky is funny. Cruel is lazy. Keep the rivalry fictional and the energy human.
- **Think longer.** Green candles are exciting. Red candles are educational. Neither one replaces judgment.

We do not follow noise We build a signal

No Promises and No Excuses

Zoki is a meme token and crypto assets are volatile. This page is deliberately less funny because your money is not a punchline.

- **No guarantees.** Nothing here promises profit, price appreciation, exchange listings, future products, rewards, or any specific result.
- **No advice.** This document is not financial, legal, investment, or tax advice.
- **Your decision.** Research independently and risk only what you can afford to lose.
- **Plans can change.** Ideas, priorities, distribution mechanics, and timelines may evolve as the project develops.
- **Security matters.** Use official links, verify addresses, protect your wallet, and assume every unsolicited message is suspicious.

Zoki promises only to remain a black cat with excellent taste.

The Mission Continues

Zoki came from the Dark Ages, found Bitcoin, and refuses to explain every next move to the internet.

- **The identity.** Black fur. Gold eyes. Pink tongue. Bitcoin B on the left ear. Zero confusion.
- **The allegiance.** Bitcoin first. cbBTC rewards. Culture before noise.
- **The method.** Reveal less. Build more. Let everybody else discover what happened afterward.
- **The invitation.** Follow the story, join the community, and bring a meme worth remembering.

Born in the dark Built for what comes next
